Hystat Systems Ltd.'s Managing Director (MD) accepts responsibility for the health, safety and welfare of Hystat Systems Ltd.'s employees, members of the public, Contractors, Sub-Contractors and any other persons who are directly employed or engaged by Hystat Systems Ltd. The MD will, in so far as reasonably practicable, take general precautions to ensure the safety and wellbeing of those persons.

Top Management is committed to the prevention of injury and ill health of the employees at Hystat and others who may be affected by their activities. Top Management are accountable for the functioning of Hystat's Occupational Health & Safety Management System and seek continual improvement and performance within it. It is a requirement of Top Management that health and safety matters are given equal priority as all other management and Hystat Systems Ltd functions. The company will provide safe and healthy working conditions for the prevention of work-related injury and ill health which are appropriate to the OH&S risks to which workers and others are exposed.

Top Management, Managers, Supervisors and all workers are to accord similar priority to health and safety matters and are to ensure that all employees, visitors, contractors and sub-contractors fully observe the intent of this OH&S Policy. The company is committed to communicating, consulting with, and participating with all workers at Hystat Systems Limited.

Hystat Systems Ltd is committed to comply with the requirements of all relevant UK and European statutory provisions and guidance to meet these obligations. The principles of this OH&S Policy apply to all Hystat Systems Ltd.'s activities, in the UK and anywhere that Hystat Systems Ltd.'s employees, contractors and sub-contractors are located for work purposes.

The company commits to and operates a system of risk based thinking that regularly evaluates its OH&S Management System, its Quality Management System, its processes, our customer's needs, its strategic direction and the overall business environment.

In order to achieve the above, Hystat Systems Ltd shall:

- Establish a framework for realistic and achievable health and safety objectives;
- Develop a hazard and prioritised risk register to help identify and reduce/prevent risk, injury and ill health to workers, visitors, contractors and sub-contractors;
- Commit to and satisfy its legal and other requirements in relation to Hystat Systems Ltd.'s occupational health and safety hazards;
- Provide the necessary resources to meet the requirements of this Policy;
- Adopt a planned approach to continually improve the management and performance of health and safety;
- Delegate the duties for health and safety to the Director Responsible for Health and Safety (Production Director); and;
- Communicate this policy and associated documents to its employees and any other interested parties as necessary.

Hystat Systems Ltd.'s OH&S Policy Statement and Occupational Health and Safety Management System will be reviewed regularly to ensure it continues to improve safety performance, reduce work related injuries and ill health, and remain relevant and appropriate to Hystat Systems Ltd.

This OH&S Policy document encompasses all areas of Hystat Systems Ltd activities, locations and operations, and is accepted by the Managing Director of Hystat Systems Ltd.
